# THE TOP ACADEMIC OHIO HIGH SCHOOLS - 2011 

NOVEMBER 14, 2011<br>PREPARED BY SCOTT GERBER

GERBER ANALYTICS, LLC

This document identifies the best schools in Ohio, based on each school's performance on the Ohio Graduation Test (OGT). This is the only report that examines Ohio's public, private, and charter schools together. It analyzes the March 2011 OGT, and it is an update to the editions that were created for the March 2007, March 2008, March 2009, and March 2010 tests.

## What Was Included?

For those unfamiliar with the OGT tests, there are five parts -- Reading, Mathematics, Writing, Science, and Social Studies. There is also a summary page that shows the percentage of students who successfully passed all five parts with a "Proficient" rating. The data used in this report is from those five parts and the summary.

There were 1,017 schools included in this analysis. The Ohio Department of Education (ODE) Local Report Card data download capability was used to acquire most of the data for the public schools. The ODE provided electronic media as the source for the private school data, the charter schools, and the "percentage of students who passed all five parts" of the test for all schools.

## Methodology Used

To obtain the initial group of schools to evaluate, the top schools were identified by using the percentage of students who scored "Proficient" on all five tests. This approach emphasizes the importance of getting all students to successfully pass the test. Those schools which had 91\% of their 10th grade students pass all five portions of the test moved to the next round of the analysis. This year, $8.2 \%$ made the cut. Eight schools passed all five portions of the test, which is better than last year. Please refer to the table below for year-to-year comparisons.

| YEAR | \# ACHIEVING 91\% <br> THRESHOLD | \% ACHIEVING 91\% <br> THRESHOLD | \# OF SCHOOLS <br> WITH 100\% PASS <br> RATE |
| :--- | ---: | ---: | ---: |
| 2007 | 59 | $6.0 \%$ | 7 |
| 2008 | 65 | $6.6 \%$ | 12 |
| 2009 | 114 | $11.3 \%$ | 13 |
| 2010 | 63 | $6.2 \%$ | 5 |
| 2011 | $\mathbf{8 4}$ | $\mathbf{8 . 2 \%}$ | $\mathbf{8}$ |

After identifying the schools that met the $91 \%$ threshold, the next step was to calculate the "Performance Index Score (Adjusted)" (PIS) for each school. This field mimics the calculation that the Ohio Department of Education uses for its Performance Index Score, and it more accurately reflects the overall performance of a school. The difference between the ODE value and this document's is that this document calculates the number only for the 10th graders who take the tests. It also calculates the field for private schools, which the ODE does not provide. Creating this field permits an apples-to-apples comparison for all schools. Click here to go to the Appendix to view the calculation.

## Identifying the Top Academic Schools

The criteria for selecting the championship schools should be relatively clear upon examination of the spreadsheet below. The shaded boxes indicate those schools which achieved the highest levels of performance in each subject area. The top ten schools in each category are shaded. The state academic champions not only had more "shaded boxes" but they also had high performance in at least three subject areas. Those schools which had the highest percentage of students in the "Advanced" column are double underlined.

Please refer to the figure below for an example. Note that $97 \%$ of this school's students received "Accelerated and Above" in Science and 81\% of its students received "Advanced." Both numbers were in the "top ten" on the list so they are shaded. The 81\% represents the highest "Advanced" percentage that any school received on the list, so it is double underlined.

Figure 1 Spreadsheet Example
Special congratulations go to the "double underlined" schools. They are St. Charles for excelling in Science and Social Studies, St. Joseph Central for Mathematics, and Columbus School for Girls for the highest "Advanced" score in Writing.

Note that the spreadsheet is long -- it contains detailed data for all of the 84 schools that reached the $91 \%$ threshold. These schools are sorted according to their PIS (Adjusted) scores.

Please note that there are numerous hyperlinks in this spreadsheet which offer a substantial amount of additional information. To view the web site of each school, click on the school name. (Please be aware that there are numerous examples of great web sites.) Also note the "DETAIL" identifier. This shows how a school performed in relation to the other schools in its Ohio High School Athletic Association (OHSAA) league. Please note that some schools are not in any league, so many were included with other non-league schools. Also note that there are three-year trend charts for each school, and trend charts are far more insightful when evaluating a school.

## Reading this chart

The shaded boxes indicate those schools which achieved the highest levels of performance in each subject area. The top ten schools in each
category are shaded. The top schools not only had more "shaded boxes" but they also had high performance in at least three subject areas. Those
schools which had the highest percentage of students in the "Advanced" column are double underlined. This list is sorted by the Performance Index Score (Adj).

## Gerber Analytics' List of State Academic Champions

This year, nine schools were named as academic champions, based on a natural break of how the schools appeared in the spreadsheet. The state academic champions for this year are listed below in Performance Index Score order:

| HIGH SCHOOL | CITY | COUNTY | YEARS AS <br> CHAMPION |
| :--- | :--- | :--- | :--- |
| St. Charles Preparatory | Columbus | Franklin | 2007,2008, <br> 2009,2010, <br> 2011 |
| St. Joseph Central | Ironton | Lawrence | 2011 |
| Hathaway Brown | Shaker Heights | Cuyahoga | 2007,2008, <br> 2009,2010, <br> 2011 |
| Seven Hills | Cincinnati | Hamilton | 2008,2009, <br> Ursuline Academy |
| Columbus School for Girls | Columbus | Franklin | 2011 |

Congratulations to these exceptional schools.

## Google Graphic

A map with the locations of the 84 schools on the list is included below. The red markers indicate the top nine schools. The map hyperlink below goes to an interactive map. The Google Satellite button may be used to view schools in more detail from a "sky view" perspective. The Google Street View feature is available for many schools (by clicking on the "yellow figure"), and it provides yet another perspective.

## This Year's Editorial

As you know from the previous reports, I am not in the education business. I perform these analyses because I am passionate about education, and because I have the time and skills to create them. My goal with this project is to identify the top academic schools and the league academic champions. Hopefully this recognition will provide additional motivation to all communities to focus more time and energy on education.

## Identifying the Top Academic Performers in Each Sports League

The information that the Ohio Department of Education provides is great, but it does not compare schools in a manner that is as relevant as it could. All communities have a familiarity with the Ohio High School Athletic Association (OHSAA) sport leagues. They see school sports results almost daily in their local papers, and this information is tracked almost religiously by a large segment of

Figure 4 Performance Index Scores of the Shelby County Athletic League Schools each community. Using the "sports perspective" for academics would present this material in a manner that is very familiar to most people. This approach would not only be far more informative because it compares people and communities that are similar, but it would also provide additional motivation for schools to improve.

It is time for a quiz. Please disconnect your Internet connection. Which school in your league performed the best in Social Studies? Where did your school finish? Did it finish in the top half or the bottom half? Where did your school finish in football?

Would your superintendent know the answers to these questions? How would your school board do? Would they only get the last question correct?

In some cases (i.e. Columbus Academy and Whitehall-Yearling), there are substantial socioeconomic differences among league participants, and their academic results will be substantially different. It is important to be aware of these differences, but it is not a reason to be unaware of the results. It may also be very difficult for Whitehall to become a division champion, but they can beat other schools in their league.

It is great to recognize athletic endeavors, and it is completely acceptable to recognize academics as well. Ohio needs to do a better job of recognizing its academic leaders.

## Strong Performers in 2011

While this document's main purpose is to identify Ohio's top performing academic schools, it is also worthwhile to identify the schools that showed significant improvement. Each of these schools had considerable success in three criteria. They are: Performance Index Score, Percentage of Students Who Passed All Five Tests, and School League Academic Ranking. Hopefully the communities of these schools are aware of these schools' accomplishments and these schools

Figure 5 Performance of Anna versus Fairlawn continue to improve their performance.

## More Education Analysis Tools on Gerber Analytics

Gerber Analytics offers additional information not available elsewhere. The locations of the 976 Ohio high schools that had Performance Index Scores for their tenth graders are shown on the state map. To reduce the processing (or load) times, the map is broken into three parts: Northern, Central, and Southern Ohio. The schools are color-coded by performance, based on their March 2011 Performance Index Scores. These categories are: Top 5\%, Top 10\%, Top 25\%, Top Half, Top 2/3's, and Lower 1/3.

## Using This List

The schools on My Top Academic Ohio High School list are all exceptional schools, however, there are other excellent schools which are not on the list because they did not reach the $91 \%$ "Passed Five of Five" threshold. If a school wants to proclaim that it is 25 th on the list, that is appropriate. To proclaim that a school is 25th in academics in Ohio, is inappropriate. Again, the $91 \%$ threshold is extremely important because it tells readers that essentially all of the students are extremely serious about academics and that all of the kids in each and every classroom really care.

There are also a few schools that were on the list last year (i.e. Columbus Torah Academy) but not this year because they did not have performance data. The ODE requires that at least ten students take the tests before they release the data and some schools did not have enough students take the test.

## To Repeat a Portion of Last Year's Report. . .

Does this document include any mistakes? Hopefully not, data was carefully entered and the numbers were double checked, but it is possible. Please send a Feedback message with any significant discrepancies. The revised document will be updated and placed online.

Will this type of ranking put more pressure on schools to do well? It might if the State of Ohio would endorse and publish the results of this type of friendly competition. It would encourage all schools and their students to do better as they strive to be one of the best schools. However, this is not about applying pressure to just the high schools. Excellent performance on this $10^{\text {th }}$ grade test is not possible without the following:

- Hard-working students who are willing to spend multiple hours on homework every night and who are challenging and competing against their fellow classmates. (And remember, unlike sporting events, every student in the $10^{\text {th }}$ grade participates and every student matters.)
- Caring parents who are giving their children an opportunity to work on their assignments and making the sacrifices to help their children by transporting them to better schools outside of their neighborhood; by paying tuition or higher property taxes (or both) to allow their children to go to a better school; and/or by moving to a community that places a greater emphasis on education
- Outstanding teachers who teach well and who can motivate their students
- Administrations who set high expectations for the students, teachers, and parents
- Outstanding elementary and middle school teachers who have established a solid foundation for the students
- Active volunteers who help with those activities that the teacher / administrative staff do not have the expertise and/or time to perform
- Supporting communities that place a high value on education and by ensuring that there is a tradition of academic excellence

Will this type of ranking force schools to spend more time emphasizing the process of test taking? Some schools spend an inordinate amount of time teaching their students to take the OGT. The above schools also prepare for the OGT, but they likely cover the fundamentals so thoroughly that the OGT is a minor distraction for them - not a major emphasis. There are also some schools that appear to have substantially better approaches than others to teach some subjects. Perhaps they would be willing to share some of their best practices with other schools?

While it would certainly be great to profit from this effort, please record the last five years of this education analysis as a pro-bono or volunteer effort. I do this type of analysis because I enjoy doing it. I am also hopeful that it will benefit an extremely large number of Ohioans. If this analysis receives a large distribution, that might happen. I certainly appreciate the Cincinnati Enquirer's coverage of this analysis for the last two years.

You may forward this report to anyone you wish but please give proper attribution if you use any of this material. To assist with tracking, please provide others with this link (www.GerberAnalytics.com/ogt/ogt_topschools.php) rather than to send them this pdf.

I have a substantial "one-of-a-kind" database, and I am open to new analysis projects. If you have an education-related analysis project in mind that you think would benefit all Ohio schools, please contact me.

Please let me know if you have any questions or comments.

## PERFORMANCE INDEX SCORE (ADJUSTED)

Note that the Performance Index Score (Adjusted) is different from what you may have seen on the Ohio Department of Education's Report Card. The calculation in this document is only for the 10th grade students. It also does not include any students who did not take the test. It was calculated as follows:

Ada High School

|  | Below <br> Basic | Basic | Proficient | Accelerated | Advanced |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Subject | $9.4 \%$ | $9.4 \%$ | $24.5 \%$ | $20.8 \%$ | $35.8 \%$ |
| Mathematics | $3.8 \%$ | $5.7 \%$ | $43.4 \%$ | $35.8 \%$ | $11.3 \%$ |
| Reading | $3.8 \%$ | $18.9 \%$ | $26.4 \%$ | $22.6 \%$ | $28.3 \%$ |
| Science | $15.1 \%$ | $9.4 \%$ | $24.5 \%$ | $22.6 \%$ | $28.3 \%$ |
| Social Studies | $5.7 \%$ | $5.7 \%$ | $39.6 \%$ | $47.2 \%$ | $1.9 \%$ |
| Writing |  |  |  |  |  |

Total of

| Above | $37.7 \%$ | $49.1 \%$ | $158.5 \%$ | $149.1 \%$ | $105.7 \%$ |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :--- |
| Average of 5 | $7.5 \%$ | $9.8 \%$ | $31.7 \%$ | $29.8 \%$ | $21.1 \%$ |  |
| Factor | 0.3 | 0.6 | 1 | 1.1 | 1.2 |  |
